(54) CELLULOSE CAPSULE USING MIXTURE SOLUTION OF PECTIN WITH GLYCEROL AND  
METHOD FOR PRODUCING THE SAME

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an effective cellulose capsule which uses pectin and glycerol and can be maintained during a long drying period without changing the film.

SOLUTION: This method for producing the cellulose capsule, characterized by having processes for (i) preparing a mixture solution of pectin with glycerol, (ii) adding a solubilized cellulose aqueous solution to the mixture solution, (iii) adding small amounts of glacial acetic acid, calcium gluconate and a sucrose fatty acid ester to the mixture, (iv) adjusting the viscosity of the mixture and leaving the mixture to stand, and then forming the capsule from the mixture.

## LEGAL STATUS

[Date of request for examination] 12.05.2000

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3455962

[Date of registration] 01.08.2003

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
